

packetTrap MAP

Know now. Do now.

The packetTrap MSP Acceleration Program gets you up and running quickly and painlessly.

packetTrap
Now you know.

Simple

The packetTrap MSP Acceleration Program (MAP) can help you navigate the transition into the managed services model without transforming your entire business model.

Dependable

Our unique combination of industry perspective and strong supporting tools and resources will help you build, price, market and even sell your new managed services.

Profitable

packetTrap's per client pricing means you, the MSP, no longer have to worry about the number of devices at each client location and can assume management of the entire network. You host it. You brand it. You own it.

Understanding your business

The MSP Acceleration Program is designed to guide you to your 'Go to Market' Managed Services goals while providing you with a framework for understanding the needs of your intended target prospects. It maps out any business or technical issues and provides you with a path for creating short and long term business goals.

Already delivering managed services?

For those IT support companies/MSP's already delivering managed services, take advantage of MAP's strong support tools and resources to help with current MSP pricing, sales and marketing strategies.

packetTrap MAP provides

Dedicated Partner Management Representative (PMR)

- Dedicated MSP consultants with strong industry specific experience
- Single point of contact for all account management needs

Customized Go To Market Planning

- Customized, SLA development designed around your internal skill sets as well as market needs
- Scalable and flexible managed services offerings with pricing and margin transparency

Ongoing Business Support

- Flexible process designed to your needs
- Customized individual engagements
